Brent Russell #516-489-2322 x1312 or Rhea Spina x1260

Outdoor recreational activities are often thought of as a great form of therapy, in part due to the interaction of the calming effects of nature and the sport related challenges of fishing. It is often recommended that utilizing a combination of types of therapies proves beneficial when working on maintaining a balanced state of mental health and wellness. The use of recreational therapies can create healthy settings for positive interaction, competition and the reframing of past experiences!
