PROPOSED LOCAL LAW NO. – 2016

A LOCAL LAW TO AMEND THE NASSAU COUNTY ADMINISTRATIVE CODE IN RELATION TO ALTERNATE POWER SOURCE BACKUP GENERATORS IN MULTIPLE DWELLINGS DESIGNATED FOR OCCUPANCY BY SENIOR CITIZENS AND DISABLED PERSONS.

RECEIVED
NASSAU COUNTY
LEGISLATURE
2016 APR -6 A 11: 29

PETER J. CLINES MINORITY COUNSEL

APPROVED AS TO FORM

BE IT ENACTED by the County Legislature of the County of Nassau as follows:

Section 1. A new Title _____ is added to the Miscellaneous Laws of Nassau County to read as follows:

TITLE _____

ALTERNATE POWER SOURCE BACKUP GENERATORS IN MULTIPLE DWELLINGS DESIGNATED FOR OCCUPANCY BY SENIOR CITIZENS AND DISABLED PERSONS

§1. Legislative Intent.

In order to prevent elderly and disabled individuals from being stranded in their dwellings during power outages, this Legislature, to the extent allowed by New York State Law and regulations, hereby requires that owners of multifamily dwellings designated for

senior citizens and disabled occupancy shall install emergency standby generators to ensure the continued operation of public elevators within the building. The Legislature is enacting this Title pursuant to its authority under the New York State Executive Law Section 379 and based on the recommendations of Nassau County Fire Commission in their proposed 2016 revision of the Nassau County Fire Prevention Ordinance incorporating standards for standby generators.

The requirements described within this legislation are intended to protect the safety and welfare of vulnerable members within the community, especially in times of prolonged power outages during catastrophic weather events such as Hurricane Irene and Superstorm Sandy as well as periodic outages caused by seasonal weather conditions such as windstorms, snowstorms, and ice storms. As the frequency and intensity of powerful storms impact the Long Island region, the necessity of an emergency standby generator system is imperative.

§2. Definitions

- a. “Senior citizen” shall be defined as individuals, male or female, who are 62 years of age or more or couples in which at least one of the individuals is 62 years of age or more.
- b. “Disabled person” shall be defined as an individual with a physical or mental impairment that substantially limits one or more major life activities of such individual.
- c. As used in section 2 (b) above, “major life activities” include, but are not limited to, caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, communicating, and working.

§3. Generator Installation- Where Required.

- a. Within six months from the effective date of this Title, any person, firm, or corporation that owns, manages, or operates a residential multifamily dwelling in Nassau County designated for occupancy by senior citizens and disabled persons, including a condominium, containing at least one public elevator, shall install an emergency standby generator system that will enable such elevator or elevators to continue to operate during and

following a natural disaster, manmade disaster, emergency, or any interruption or outage in the electrical power supply. The emergency standby generator system shall also have the capacity to provide power to illuminate all common areas and emergency signs as well as keep fire safety equipment such as sprinkler systems and smoke and fire alarms operational throughout the building.

- b. Any person, firm, or corporation that owns, manages, or operates a residential multifamily dwelling in Nassau County designated for occupancy by senior citizens and disabled persons, including a condominium, containing at least one public elevator constructed in Nassau County after the effective date of this local law shall be equipped with an emergency continuous generator system that shall enable such elevator or elevators to continue to operate during an interruption or outage in the electrical power supply. The continuous generator system shall have the capacity to provide power throughout the building to operate continually with a consistent load.

§4. Standards for Installation, Maintenance, and Testing.

All emergency standby and continuous generators subject to this Title shall be installed, maintained, and tested in accordance with the Nassau County Fire Prevention Ordinance, National Fire Prevention Association Standards, and the National Electrical Code.

§5. Enforcement

- a. The Chief Fire Marshall shall promulgate rules, including but not limited to inspection and the issuance of certificates of compliance, to carry out the provisions of this Title.
- b. Any owner or agent who knowingly and willfully violates any provision of this article or who fails to comply with any order or requirement of the

Chief Fire Marshall shall be guilty of a violation punishable by a fine of not more than \$1,000 or by imprisonment of not more than 15 days.

- c. Nothing stated within this Title or rules promulgated by the Chief Fire Marshall shall limit or restrict the authority of the jurisdictions where the multifamily dwelling is located to regulate the installation, maintenance, and inspection of elevators.

§6. Notice of Backup Generator on Premises.

- a. All multifamily dwellings subject to this Title shall post signage conspicuously next to each elevator to notify persons therein that an alternate power source generator system is located on the premises that will enable such elevator or elevators to continue to operate in the event of an interruption or outage in the electrical power supply. Such sign shall be printed on a white card in red letters at least one-half inch in height the following statement: "This building is equipped with a backup generator to provide power for elevator operation in the event of a power outage."
- b. The Chief Fire Marshall is hereby authorized, empowered, and directed to affix such signage within ten days of installation and inspection of any emergency standby or continuous generator.
- c. For any new construction of a multifamily dwelling where seniors or disabled persons shall reside, the Chief Fire Marshall shall affix the signage required pursuant to Section 6 (a.) of this Title within ten day from the date the certificate of occupancy is issued by the department of buildings or similar authority within the jurisdiction in which the dwelling is located.

§7. Affordable Residential Dwellings.

To minimize or eliminate passing on the cost complying with this Title to individuals living in a multifamily affordable residential dwelling for senior citizens or disabled persons that is financed or insured by the United States Department of Housing and Urban Development, any person, firm, or corporation that owns or manages such dwelling must make every effort to obtain grant funding from the Federal Government or the State of New York for the purpose recouping the cost of purchase and installation of the emergency and standby generator system .

Section 2. Severability.

If any clause, sentence, paragraph, subdivision, section, or part of this law or the application thereof to any person, individual, corporation, firm, partnership, entity, or circumstance shall be adjudged by any court of competent jurisdiction to be invalid or unconstitutional, such order or judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, section or part of this law, or in its application to the person, individual, corporation, firm, partnership, entity, or circumstance directly involved in the controversy in which such order or judgment shall be rendered.

Section 3. SEQRA Determination.

It is hereby determined, pursuant to the provisions of the State Environmental Quality Review Act, 8 N.Y.E.C.L, section 0101 at seq. and its implementing regulations, Part 617 of 6 N.Y.C.R.R., and Section 1611 of the County Government Law of Nassau County, that the adoption of this local law is a "Type II" Action within the meaning of Section 617.5(c)(20) and (27) of 6 N.Y.C.R.R., and, accordingly, is of a class of actions which do not have a significant effect on the environment, and no further review is required.

Section 4. Effective Date.

This local law shall take effect ninety days after enactment, subject to any additional review which may be required by the New York State Fire Prevention and Building Code Council.

Introduced by: Legislator Siela Bynoe.

Co-sponsored by: Minority Leader Kevan Abrahams and Legislators Judy Jacobs, Delia DeRiggi-Whitton, Carrié Solages, Laura Curran, and Ellen Birnbaum.
