OVERVIEW

The Office of Management and Budget (OMB) is pleased to issue the Fiscal 2010 Second Quarter Financial Report. The results for Fiscal Year ending December 31, 2010 reflect a projected deficit of \$36 million prior to additional gap-closing actions. Second quarter projections assume the bonding of property tax certiorari refunds in excess of the \$50 million included as an operating expense in the 2010 Adopted Budget.

To offset or mitigate the projected deficit, the Mangano Administration has begun implementing the following initiatives:

- ➤ Offering an early retirement incentive and opting into the New York State incentives to reduce labor costs. On June 7, 2010, a retirement incentive was passed by the County Legislature and signed by the County Executive. As of July 28, 2010, 410 Nassau County employees had signed up for the two incentives and substantial savings are anticipated;
- ➤ On June 21, 2010, the County Legislature approved the creation of a Shared Services Department to eliminate redundant functions within the departments by consolidating services. It is anticipated that greater efficiencies and enhanced productivity will result from this initiative;
- ➤ On July 19, 2010, the County Legislature approved the creation of a Nassau/Suffolk Purchasing Consortium to generate significant cost savings through high volume purchasing of County required goods and services; and
- ➤ The Nassau County Department of Parks, Recreation and Museums instituted a Summer Recreation Program designed for children ages 5-12. The program provides low cost recreational services at various park facilities throughout Nassau County. This is the first time that Nassau County has offered this type of program.

Additional initiatives currently being undertaken by the Mangano Administration for purposes of further reducing the projected budget deficit include, but are not limited to the following:

- ➤ Negotiating with the collective bargaining units to obtain concessions on previously agreed to contractual increases and incentives to reduce labor costs;
- Actively reviewing and monitoring expenses and contracts on an ongoing basis and;
- > Exploring the use of private/public partnerships to reduce Nassau County's expenses for non-County related services.

The Administration has begun and will continue to develop initiatives that will focus on real-time cost savings and greater operational efficiencies while continuing to provide the highest quality of service to its constituents.

EXPENDITURE RESULTS

Salaries

The 2010 projected salaries for the five major funds is \$835.2 million which includes \$676.2 million for base wages and \$63 million for overtime of which \$38.5 million is for Police and \$18.4 million is for the Correctional Center. In addition, termination pay is projected to be \$19.5 million of which \$11.2 million is for Police. The balance of the projected salaries is for other salary items such as longevity, differential pay, and holiday pay.

<u>Base Wages</u>: As of June 30, 2010, the County had 8,385 full-time and 85 contract employees which represents 422 fewer positions than in the 2010 Adopted Budget of 8,892 (8,809 full-time employees and 83 contract employees). The reduction in salary expenditures is primarily attributable to vacancies in staffing.

Overtime: The Police Department's 2010 Adopted Budget provides \$32 million in overtime funding. Through June 2010, the department incurred \$12.4 million in overtime expense. Through June 2010, the total number of both civilian and sworn overtime hours is 194,322 including overtime hours reimbursed by other County departments. Management is working with the Police Department to control overtime.

The Correctional Center's Fiscal 2010 Adopted Budget provides for \$15.4 million in overtime expense for correctional officers. As of June 30, 2010, the Correctional Center overtime expense is \$7.8 million. The number of overtime hours incurred in the Correctional Center through June 2010 was 155,621.

Employee Benefits

The 2010 Adopted Budget for employee benefits of \$413.0 million includes a wide variety of expenses highlighted by pensions, employee and retiree health insurance, and Workers' Compensation.

The budget for pensions and health insurance represents the largest portion of employee benefits at \$309 million. Pension and health insurance expenditures are projected to be \$312.4 million which will be an increase of \$3.4 million over the 2010 Adopted Budget. The projected increase in health insurance rates between the current projection and the 2010 Adopted Budget for active employees as well as retirees are 1.6 percent and 1.4 percent, respectively.

The Workers' Compensation expense portion of employee benefits is projected to be \$25.3 million for 2010. This is a 15.3 percent increase from 2009 and is primarily related to new guidelines established by the New York State Workers' Compensation Board, which reduced the amount of time in which Workers' Compensation awards must be granted and continued increases in indemnity rates of 20 percent as of July 1, 2010. Risk Management is actively working with a Third Party Administrator to accelerate the use of Lump Sum settlements to help decrease the use of operating funds. During the second quarter, the County has been successful in reaching an agreement on 19 additional individual claims, providing an annual budgetary savings of \$3.5 million with additional claims still under negotiation.

.

Other Than Personnel Services

Several contingency measures have been implemented to address the projected shortfall. These measures include restrictions on all other-than-personnel-services (OTPS) spending. This effort is managed jointly by the Office of Management and Budget (OMB) and the Purchasing Department. OMB and Purchasing will scrutinize and limit new departmental expense requests with the goal of generating a projected \$13.5 million positive variance for 2010.

Utility Costs

Utility costs include expenditures for electricity, natural gas, telephone, water, fuel oil and thermal energy. The Long Island Power Authority (LIPA) is the main supplier of electricity and National Grid is the primary provider of natural gas. The County has a contractual relationship with the Trigen Nassau Energy Corporation to supply the County with thermal energy through the mediums of high temperature hot water, chilled water and steam. The County is projecting utilities expense of \$36.6 million, which is \$2 million lower than the 2010 Adopted Budget. This budget pickup resulted from lower actual costs than projected under LIPA's balanced billing program.

Direct Assistance

Direct Assistance includes Recipient Grants, Purchased Services, and Emergency Vendor Payments. Recipient Grants are payments made to a client for services such as Temporary Assistance for Needy Families (TANF), Safety Net, Foster Care, and the Food Stamp Program. Purchased Services include Day Care, Preventive and Protective Services, and Homemaker Services. Emergency Vendor Payments include those for Special Education Assistance, Persons In Need of Supervision (PINS), Department of Social Services (DSS) Juvenile Detention Center custody, court placements, and handicapped services.

The 2010 Adopted Budget for Direct Assistance programs (which does not include Medicaid expenses) is \$170.2 million, compared to the projection of \$184.0 million. The \$13.8 million projected deficit results from significantly higher TANF and Safety Net caseloads, increased emergency shelter payments for citizens, and higher rates and volume of cases for the Day Care service program.

Pre-School Special Education/Early Intervention Program

Early Intervention Program

Early Intervention (EI) is an entitlement program that provides specialized services to children under age three with developmental delays and disabilities. Services include evaluations to determine eligibility, as well as a comprehensive array of services to eligible children, including service coordination, speech/language therapy, physical therapy, occupational therapy, special education, family counseling, and transportation.

Preschool Special Education Program

This program pays for educational and supportive services to special needs children ages three to five. The program offers center-based evaluations, educational services, itinerant services, and transportation. Eligibility and level of services is determined by the local school district through the Committees on Preschool Special Education (CPSE). The program also oversees a County-wide transportation system

for both the Early Intervention Program (ages one to three) and Preschool Program (ages three to five). The Preschool Special Education program also provides financial support for Summer School programs for 5 to 21 year-olds.

The projected Preschool Special Education/Early Intervention Program budget of \$167.9 million results in a surplus of \$5.7 million against the 2010 Adopted Budget of \$173.6 million. The favorable variance is attributable to a less than anticipated growth rate in the number of Early Intervention children served. State Aid for Pre-School Special Education and Early Intervention are reimbursed at 59.5 percent and 49 percent, respectively.

Revenue Results

Sales Tax

The most closely monitored revenue source in the County's budget is sales tax because it accounts for approximately 33 percent of all County receipts and is susceptible to dramatic annual fluctuations as a result of economic conditions that are beyond the County's control. The sales tax rate in Nassau County is 8 5/8 percent (four percent is retained by the State, 3/8 percent is earmarked for the MTA, and 4½ percent is forwarded to the County, of which ½ percent is distributed to the local towns and cities). Effective June 1, 2010, the Residential Energy tax of 2.5 percent, which was included in the 2010 Adopted Budget for sales tax, was eliminated.

Excluding receipts from the Residential Energy Tax which was repealed effective June 1, 2010, the County is projecting sales tax of approximately \$956.5 million which would result in a growth of approximately \$27.2 million or 2.9% over 2009's receipts of \$929.3 million. This projected amount results in a shortfall of approximately \$6.8 million or less than 1% when compared with the 2010 adopted budget amount of \$963.3 million. While revenue from the residential energy tax is projected to be \$17.5 million (January 1, 2010 through June 30, 2010), the impact of the repeal of this tax for 2010 is an approximate \$22.3 million shortfall from the 2010 adopted budget amount of \$39.8 million.

State and Federal Aid

The Fiscal 2010 Adopted Budget includes \$231.4 million in State Aid. This Second Quarter Report reflects a deficit of \$19.4 million. The projected deficit is primarily due to the failure of the New York State Legislature to implement a County increase in cigarette sales tax which would have resulted in an additional \$16 million in revenue. Approximately \$5.0 million is due to lower spending in Preschool expenses. These items were partially offset by higher reimbursements for Home Relief and other reimbursable expenses in the Department of Social Services (DSS).

The Fiscal 2010 Adopted Budget includes \$177.5 million in Federal Aid. This report reflects a projected surplus of \$4.2 million. This surplus is primarily due to an increase in TANF, Safety Net, and Day Care caseload reimbursements in the DSS.

Department Revenues

Department revenues are generated from fee-based services provided by various County departments. In 2010, the projected impact is a net deficit of \$3.6 million when comparing the current projection of \$97.4 million with the 2010 Adopted Budget amount of \$101.0 million. The deficit is primarily resulting from lower attendance in the County Parks as well as lower Medicaid and other insurance reimbursements to the Department of Health.

Fiscal 2010 First Quarter Economic Activity Report

The US economy, which entered a recession in December 2007, experienced slightly positive growth in the second quarter of 2010, which continued from the first quarter of 2010. Even with the pickup of the economy, it will likely be a more tepid recovery for the remainder of the year as several factors will continue to weigh on the pace of gains.¹

National Economy

- o In the U.S., the economy will likely not see the gains experienced prior to the recession of 2007 due to slower gains in consumer spending. The more modest rise in consumer spending will most likely be the result of high unemployment, which will hover at or below 10 percent during the year. Currently, the national unemployment rate stands at 9.5 percent.² The current unemployment rate may be slow to fall even with a gain in the economy as many employers are generally unwilling to bring in new employees until they are confident that the gains for the economy will last. Also, with housing prices having fallen sharply from their peaks of a few years ago and the availability of credit still somewhat limited, consumer spending will be restrained.³
- O Spending for investments may increase slightly as the year progresses, with much of that growth coming from the housing sector. As a result of the government-funded home buyer tax credit and lower interest rates and home prices, home purchases have moderately increased. Once the tax credit expired in April 2010, home sales dropped off to their lowest level of the year in May. However, economists predict that significant growth in new housing starts will not be seen for a considerable time. This is due to the steep falloff and the excess of homes currently on the market. The pace of spending by businesses that did not see the steep decreases posted by the residential sector will likely bounce back with an economic recovery.
- Outlays by the federal government will also be restricted as large deficits continue to grow, ultimately resulting in more difficult choices. State and local governments will also see spending tempered due to restricted revenue streams.¹
- o Foreign trade may provide an area for gains with the demand for exports rising as foreign economies start to emerge from there downturns.
- o Employment gains in the U.S. in the second quarter were restricted due to the recent downturns in the construction and manufacturing sectors, even though manufacturing added 9,000 jobs in June, for a total of 136,000 added jobs since December 2009. The construction sector shed 22,000 jobs, offsetting the gains of the prior two months. Employment in the financial sector may see slower gains due to fewer new entrants. Retail trade employment experienced little change as consumer spending was held in check. The government sector will most likely see slower gains due to annual budget deficits being felt al all levels (Federal, State and Local). This leveling out of the demand for labor will cause unemployment to remain at or slightly below the 10 percent level even with modest gains in the national GDP seen at the start of 2010.

 - Bureau of Labor Statistics. http://www.bls.gov/news.release/empsit.nr0.htm
 - 3. Reuters News Agency. www.reuters.com
 - 4. US Census Bureau; www.census.gov

o The decline in economic growth will imply a more modest pace for aggregate demand which would generally be anticipated to hold price gains under control. However, some of that may be offset by a rise in the general price level due to all the money that the Federal Reserve has pushed into the economy since the recession started in an effort to balance the spending decrease particularly by consumers. ¹

Sales Regional Economy

- o For Nassau County and the region, the impact of the national recession continued to weigh on the local economy in the second quarter. Nonfarm payroll employment though, increased slightly by 0.2 percent from May 2009 to May 2010 in both Nassau and Suffolk Counties. Payroll employment for the region remained steady from May 2009 to May 2010. ²
- o The unemployment rate for both Nassau and Suffolk Counties stood at 6.7 percent, slightly lower than 6.9 percent from a year ago. While the Long Island economy may be less impacted than the national economy, gains are yet to be seen across all industry sectors. 4
- o The major reason for the more modest falloff in County employment is the fact that local employment is less cyclical when compared to national employment due to the greater mix of service sector employment locally and less employment in the construction and manufacturing sectors. Employment in Nassau County has been impacted since it houses occupations in the financial, information, manufacturing, professional and business services sectors. Unemployment for the region is below that of the U.S. and is anticipated to stay that way for the remaining two quarters of 2010. ³
- o With the sharp downturn in the financial sector, the stock market has responded by remaining at a yearly low of 9,800. This is similar to the opening of the first quarter, when the Dow was at or around 10,000 points, essentially pointing to a flat market. As the first quarter ended and the second quarter began, a rise in the Dow index up to 11,100 points fueled optimism that an economic recovery was in sight. But a cooling down in stock prices brought the index back to 9,800 points in June, alluding to the fact that a complete economic recovery is not in the near future.⁵
- o Following a rise throughout 2006, both existing home sales and the median price for homes have begun to rise in the second quarter after a moderate fall-off at the start of 2010 in Nassau County. In April 2010, home sales hit a yearly high of 616 units sold in Nassau County, while the median price increased slightly to \$420,000 in May. The government funded home buyer's tax credit, which expired in April, may have contributed to the increased demand in purchased homes, driving up price.²
- O Despite the recent slow down in the economy, an increase in consumer spending will have a positive impact for County sales tax revenues. Collections rose considerably during the first two quarters of the year and revenues are anticipated to increase for the remainder of the year. These collections will impact future revenues greatly as gains in the future may be more modest as the County moves to a longer term growth trend rate.

Sales Tax Revenue for 2nd Quarter of 2010

Table 1 summarizes the actual second quarter monthly sales tax revenue from fiscal year 2001 to 2010. For the 2nd quarter of 2010, the total revenue from sales tax was approximately \$242.8 million, a 4.3 percent increase over the second quarter 2009.⁵ The percent change in revenue in the second quarter of 2010 versus the second quarter of 2009 indicates a positive sign that despite the economic slowdown, consumers are willing to spend. It is important to note that this increase is the largest percent change in ten years. Meanwhile, over the long term, the ten year quarterly average for sales tax revenue is \$223.7 million.

Soruce: Public Financial Management, Inc.

KPI REPORT 10: Tax Certiorari Report

The County's Assessment Review Commission (ARC) has completed its actions as they relate to the 2010/11 tax year. The results of ARC actions include the following statistics:

Parcels Appealed

Residential 107,521 Commercial 19,087 Total Appealed 126,608

Parcels Reduced on Assessment Roll

Residential 37,413 Commercial 9,000 Total Reduced 46,413

We expect to continue our joint conference program with the County Attorney throughout the summer. This joint program has helped in increasing the commercial case settlement activity. We expect the affiliation between ARC and the County Attorney's office to provide for an efficient case settlement environment. Additionally, ADAPT, the County's multi-department tax cert case management system, is expected to come online in the fall of this year. This will provide for a shared information "platform".
