

Ascend Long Island

nationalgrid

National Grid is excited to partner with Ascend Long Island on our residential weatherization program, known as Total Home Comfort Program (THCP). The goal of this Residential Weatherization Program is to encourage the installation of weatherization measures and building envelope improvements, such as insulation, air sealing, and window improvements by residential natural gas heating customers. In addition to working with diverse entrepreneurs on Long Island, we proudly welcome diverse business owners located in Southeast Queens for this dynamic initiative.

We are recruiting existing and start up diverse businesses in the following industries:

- **Energy Efficiency Program Management**
- **Energy Efficiency Consultants**
- **HVAC**
- **Plumbers**
- **Electricians**
- **Weatherization**
- **Welders**
- **Construction- High Performance Buildings**
- **Project Management**
- **Sustainability**
- **Green Energy**
- **Wind/Solar**
- **Boilers**
